MAXFORCE® FC Professional Insect Control®
Roach Killer Bait Gel (Reservoir)

SECTION 1. CHEMICAL PRODUCT AND COMPANY INFORMATION

Product Name: MAXFORCE® FC Professional Insect Control® Roach Killer Bait Gel (Reservoir)
Chemical Name:
Common Name:
MSDS Number: 1777
Chemical Family:
Chemical Formulation:
EPA Registration No.: 432-1259

Bayer Environmental Science
95 Chestnut Ridge Road
Montvale, NJ 07645
USA

For MEDICAL, TRANSPORTATION or Other EMERGENCY call 1-800-334-7577 24 hours/day
For Product Information call 1-800-331-2867

SECTION 3. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview: Caution! Keep exposed gel away from open food and food contact surfaces. Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling.

Do not use this product in or on electrical equipment where a possibility of shock hazard exists.

Odor: Sweet

Appearance: Dark brown

Immediate Effects:
Eye: Avoid contact with eyes. Moderately irritating to the eyes following prolonged
Material Safety Data Sheet
MAXFORCE® FC Professional Insect Control® Roach Killer Bait Gel (Reservoir)

SECTION 4. FIRST AID MEASURES

Eye
Flush eyes with plenty of water. Call a physician if irritation persists.

Skin
Wash with plenty of soap and water. Get medical attention immediately if irritation persists.

Ingestion
Drink two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

Notes to physician

Signs and Symptoms
Effects resulting from over-exposure are not anticipated to occur from use of the bait gel. In severe cases of overexposure to fipronil itself (the active ingredient) by oral ingestion, lethargy, muscle tremors, and in extreme cases, possibly convulsions may occur.

Treatment
There is no specific antidote.

TREATMENT FOR FIPRONIL OVERDOSE:
Recommendations for treatment are based on anticonvulsant therapy as routinely administered to humans. Phenobarbital or diazepam may be useful in controlling convulsions induced by Fipronil.

Even when symptoms of Fipronil intoxication are rapidly reversed by treatment, the treatment must be continued for several days, gradually decreasing the dose of anticonvulsant based on the patient's clinical response. This is necessary due to the slow elimination of the compound.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point
Not flammable or explosive

Fire and Explosion
Under fire conditions, toxic, corrosive fumes may be emitted due to the presence
Material Safety Data Sheet

MAXFORCE® FC Professional Insect Control® Roach Killer Bait Gel (Reservoir)

Hazards of the active ingredient, fipronil.

Suitable Extinguishing Media
Dry chemical, Foam, Water, Carbon dioxide (CO2)

SECTION 6. ACCIDENTAL RELEASE MEASURES

General and Disposal
Wear appropriate gear for the situation. See Personal Protection information in Section 8.

Land Spill or Leaks
If the active ingredient fipronil is spilled on the ground, the affected area should be scraped clean and placed in an appropriate container for disposal. Decontaminate tools and equipment following cleanup. Avoid creation of dusty conditions.

SECTION 7. HANDLING AND STORAGE

Handling Procedures
Keep exposed gel away from open food and food contact surfaces. Do not treat food preparation surfaces.

Fipronil: Avoid contact with skin, eyes and clothing. Avoid breathing vapors and mists. Do not ingest.

Storing Procedures
Fipronil: Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry area out of reach of children and animals. Store away from heat or sunlight.

Work/Hygienic Procedures
Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.

Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

Wash skin promptly to remove accidental contact with the active ingredient, fipronil.

Avoid contact with skin and clothing. Wash skin with soap and water if contact. Remove contaminated clothing and launder before re-wearing. Wash clothing with detergent and hot water before reusing. Contaminated clothing should not be taken home or laundered with other clothing.
SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls
Use general ventilation to minimize exposure.

Body Protection
Applicators and other handlers must wear: Long-sleeved shirt and long pants. Shoes plus socks. Chemical-resistant gloves made of waterproof material such as neoprene, butyl rubber, barrier laminate or nitrile rubber.

All pesticide handlers (mixers, loaders, and applicators) must wear a long-sleeved shirt and long pants, socks, shoes, and chemical-resistant gloves.

General Protection
These recommendations provide general guidance for handling this product. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Waste resulting from these procedures should be handled in accordance with Section 13: Disposal Considerations.

Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.

Exposure Limits
None Established

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Dark brown

Odor
Sweet

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability
Fipronil is stable under normal handling and storage conditions.

Conditions to Avoid
Direct sunlight
Exposure to extreme heat
Product will stain porous surfaces.

Incompatibility
Strong acids and strong bases
Strong oxidizing agents

Hazardous Products of Decomposition
Decomposition Type: thermal
Hydrogen fluoride
SECTION 11. TOXICOLOGICAL INFORMATION

NOTE: Data for the acute information is based on studies performed on a similar formulation with 0.25% fipronil.

Acute Oral Toxicity  Rat: LD50: > 5,000 mg/kg
Acute Dermal Toxicity  LD50: > 2,000 mg/kg
Acute Inhalation Toxicity  Rat: LC50: > 2.9 mg/l
Skin Irritation  Rabbit: Slightly irritating.
Eye Irritation  Rabbit: Non-irritating.
Sensitization  Guinea pig: Non-sensitizing

Assessment Carcinogenicity
ACGIH  None
NTP  None
IARC  None
OSHA  None

SECTION 12. ECOLOGICAL INFORMATION

Acute and Prolonged Toxicity to Fish  The following data is based on the technical grade active ingredient(s).
Rainbow trout  flow-through test
LC50: 0.248 mg/l
Exposure Time: 96 h
Mean concentration.
Bluegill sunfish  flow-through test
Material Safety Data Sheet

MAXFORCE® FC Professional Insect Control® Roach Killer Bait Gel (Reservoir)

LC50: 0.085 mg/l
Exposure Time: 96 h
Mean concentration.

Acute Toxicity to Aquatic Invertebrates

The following data is based on the technical grade active ingredient(s).
Daphnia flow-through test
EC50: 0.248 mg/l
Exposure Limit: 48 h
Mean concentration.

Toxicity Other Non Mammal Terr. Species

The following data is based on the technical grade active ingredient(s).
Mallard duck
LC50: > 5,000 mg/kg
Exposure Time: 8 d
Dietary concentrations. Mean concentration.

Bobwhite quail
LC50: 48 mg/kg
Exposure Time: 8 d
Dietary concentrations. Mean concentration.

Environmental Precautions

Toxic to birds, fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate surface or ground water by cleaning equipment or disposal of wastes, including equipment washwater. Contain runoff to prevent entry into sewers or waterways.
Additional Environmental Information

For chemical fate data call the product information phone number listed in Section 1.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Chemical additions, processing or otherwise altering this material may make the waste management information presented in this MSDS incomplete, inaccurate or otherwise inappropriate. Please be advised that state and local requirements for waste disposal may be more restrictive or otherwise different from federal laws and regulations. Consult state and local regulations regarding the proper disposal of this material.

Container Disposal

Wrap used pre-filled plastic reservoirs in several layers of newspaper and discard in trash.
